DETAILED ACTION

1. The submission of the amendment filed on 12/11/02 is acknowledged. At this point claim1 has been amended and is at issue in the instant application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shu (US 6,03,0104) in view of Gardner (US 4,039,894).

Shu discloses (Fig.1) a soft shelled lamp shade [1] assembly directly with a bulb; a shade body formed of soft plastics having a good light transmission, heat dissipation function (col.1, lines 43-45) and can be made into any desired shape (variable outlook) [see Abstract].

Shu disclose the instant claimed invention except for an inner surface portion adapted for contiguous contact with a corresponding portion of the light bulb.

Gardner discloses (Fig.1) a lighting device wherein the inner surface portion of the shell (casing) [12] adapted for contiguous contact with a corresponding portion of the light bulb [14] for bulb protection (col.1, lines 55-57).

It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to provide the shell of Shu adapted for contiguous contact with a corresponding portion of the light bulb as taught by Gardner for purpose of the bulb protection.

Response to Arguments

3. Applicant argue that Shu reference fails to disclose an inner surface portion adapted for contiguous contact with a corresponding portion of the light bulb.

In response, Examiner is aware that Shu fails to disclose an inner surface portion adapted for contiguous contact with a corresponding portion of the light bulb, hence Gardner is used in a 103 rejection to teach the use of the inner surface portion of the shell adapted for contiguous contact with a corresponding portion of the light bulb.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
